

TOWN OF MILLIS, MA

HOW STORMWATER UTILITY AREAS WERE DETERMINED

The Town implemented and passed in November 2017 a Stormwater Utility bylaw which allows for the creation of a dedicated fund for stormwater management. This promotes effective management of drainage infrastructure, streamline municipal operations, and provides transparency in spending.

The Board of Selectmen set billing rates at a Public Hearing on June 25, 2018.

The Town developed a rate structure based on the amount of impervious area on a parcel. Impervious surfaces include rooftops, pools, patios, all driveways, walkways, and parking lots.

The Stormwater Utility Fee chart is below:

Number of Billing Units	Square Feet of Impervious Area	Annual fee
0	0-199	\$0.00
1	200-1499	\$33.00
2	1500-2499	\$66.00
3	2500-3499	\$99.00
One additional billing unit for each additional 1000 square feet increment of impervious area greater than 3499 square feet.
